Verifiable: Yes

No problems identified.

In summary the Wishlist does fulfill most of the requirements such as Clarity, Consistency, that the point is clear and unambiguous. However, on some point the items lacks measurability and verifiability. may require further clarification or verification during the development process.

User stories

As a prospective member, I seek a landing page with a clear and captivating headline that succinctly communicates the core value of USNStart Coworking Space.

As a potential member, I desire high-quality images or videos on the landing page showcasing the coworking space's interior, workstations, communal areas, and facilities for a vivid visualization experience.

As a potential member, I aim to effortlessly locate and comprehend the various membership plans and pricing options on the website, enabling me to select the option aligning best with my requirements.

As a potential member, I wish to be informed about key amenities and facilities available, such as high-speed internet, meeting rooms, and a coffee lounge, aiding me in assessing if they meet my specific needs.

As a potential member, I want comprehensive location information, including the address, map, and details about nearby public transportation or parking options, facilitating effective commute planning.

As a potential member, I look forward to reading positive testimonials or reviews from current members on the website, fostering trust and confidence in the coworking space.

As a potential member, I expect to easily find multiple contact options, including an email address, phone number, and contact form, facilitating seamless communication with USNStart Coworking Space for further inquiries.

As a potential member, I anticipate a brief overview of the coworking space's history, mission, and values in the "About Us" section to understand the unique aspects of the community.

As a potential member, I require the website to be responsive and mobile-friendly, ensuring accessibility on different devices and screen sizes without any issues.

As a potential member, I seek assurance that my data will be protected, with the website implementing privacy and security measures to ensure the safety of my information.

As a potential member, I want to view the proposed floor plan and interior design images on the website, providing insights into the layout and ambiance of the coworking space.

As a potential member, I desire the ability to book available desks in the open workspace using a visual and interactive floor map on the website, ensuring a convenient reservation process.

As a potential member, I expect to receive confirmation after making a desk reservation, providing assurance that my booking was successful.

As a student, I appreciate a separate membership option and pricing tailored for students, simplifying the identification of the most suitable plan for my needs.

As a project owner, I prefer the website to be developed using HTML, CSS, and JavaScript for easy hosting and publishing without the need for a content management system.

As a project owner, I envision a visually appealing website design aligned with provided interior design concepts and the floor plan, creating a cohesive and attractive online presence.

As a project owner, I insist on integrating privacy and security measures into the website to safeguard user data, instilling trust and reliability in potential members.

As a project owner, I emphasize a user-friendly and easy-to-navigate website, ensuring a positive user experience for potential members.

As a project owner, I seek a website that accurately conveys key information about the coworking space, membership plans, and existing tenants, empowering potential members to make informed decisions.

As a project owner, I aspire for the website to showcase high-quality visuals, including images, videos, and graphics, effectively highlighting the coworking space's interior and amenities to attract potential members.
